

PRO EPT Spray Lubricant

Description

PRO EPT Spray Lubricant has been formulated with the latest PTFE (Polytetrafluorethylene) and polymer technology. Blended with premium anti-wear, anti-corrosion and moisture displacing additives means PRO EPT Spray Lubricant can outperform rival products with ease, making this all-new spray lubricant a product with unlimited uses.

Applications

- Mechanical equipment repair
- Marine & water sports equipment
- Plastic tooling ejector pins
- Slide tracks & trailer curtains
- Shearing hand pieces
- Precision equipment & controls
- Splines, cables, chains & slides
- Cars, trucks & motorcycles
- Guns, rifles & military equipment
- Threads, tapping & drilling
- Remote control hobby equipment
- Safe tumblers & locks
- Pneumatic equipment
- Bearings & bushes
- Drilling stainless steel & tapping

Features & Benefits

Marine applications are one of the best ways to evaluate the moisture displacing properties of a spray lubricant. Sea water proves to be no match for this products ability to repel moisture on contact and to create a long-lasting protective barrier that outlasts other sprays. The extreme pressure lubricating performance of PRO EPT spray lubricant means one quick application will remove all dry contact and continue to provide an almost permanent lubricating film.

The rapid penetrating action of PRO EPT Spray Lubricant means quick and easy removal of rusted of tight nuts and threads as well as easy disassembly of weathered components, while leaving a long-lasting residual film.

Master Item# 2839

Pack Size Availability: 300g with Smart Nozzle
